📍 Dundee, UK

Profile

I am a Computing Science student from Mariupol, Ukraine, currently residing in Scotland. My journey with technology began early, evolving from editing videos and creating 3D models to programming and developing projects independently. This initial curiosity transformed into a genuine passion for understanding systems and enhancing them creatively.

The experience of relocating from Ukraine taught me adaptability, resilience, and efficient learning under pressure in a new linguistic, cultural, and educational environment. I have developed a strong ability to work independently, meet deadlines, and face challenges directly.

I enjoy merging creativity with technical skills, whether through coding, problem solving, or designing visually appealing and functional projects. My ambition is to continue growing through real-world projects, enhance my programming abilities, and pursue a career in software development, creating well-crafted solutions that make a meaningful impact.

Professional Experience

01/2025 – Present Remote, Sydney	Technical Asset Developer <i>Transport for NSW</i> Created and optimised 3D assets for a Sydney traffic simulation using Blender and Photoshop. Researched real buildings to match proportions and details accurately. Worked directly with the client, updating assets based on feedback and maintaining an organised workflow. Managed over 100 assets with organised workflow and high accuracy.
03/2025 – 04/2025 Dundee, Scotland	Software Developer <i>University Project</i> Developed a Java-based social networking application as part of a university project. Implemented core features such as user accounts and profile management. Focused on clean code structure, object oriented programming, and logical problem solving. Gained experience working in a team on software design and functionality testing.
03/2024 – 03/2024 Dundee, Scotland	Web Developer / Team Member <i>University of Dundee Hackathon</i> Worked in a team of four to design and build a website showcasing University of Dundee campus locations within 24 hours. Contributed to HTML structure, CSS styling, and overall design ideas. Managed project organisation and took part in the final presentation for judging.

Education

2022 – 2024 Buckie, Scotland	Scottish Secondary Education <i>Buckie High School</i> Completed S5–S6 studies with emphasis on Computing, Mathematics and English. Successfully transitioned from the Ukrainian to Scottish education system, developing strong language, communication and academic skills.
---------------------------------	--

2012 – 2023 Mariupol, Ukraine	Ukrainian Secondary Education <i>School No. 34</i> Finished secondary education in Mariupol with a focus on mathematics and languages. Gained early experience in leadership as class president and interest in technology.
2024 – Present Dundee, Scotland	BSc (Hons) Computing Science <i>University of Dundee</i> Currently studying Computing Science at the University of Dundee, focusing on software development and problem solving. Building a strong foundation in programming, data structures, and system design through coursework and personal projects.
